

# Integrating Social Information into Joint Venture Goals and Planning

**Mark P. Vrtiska, Ph.D.**

**Waterfowl Program Manager  
Nebraska Game and Parks Commission**

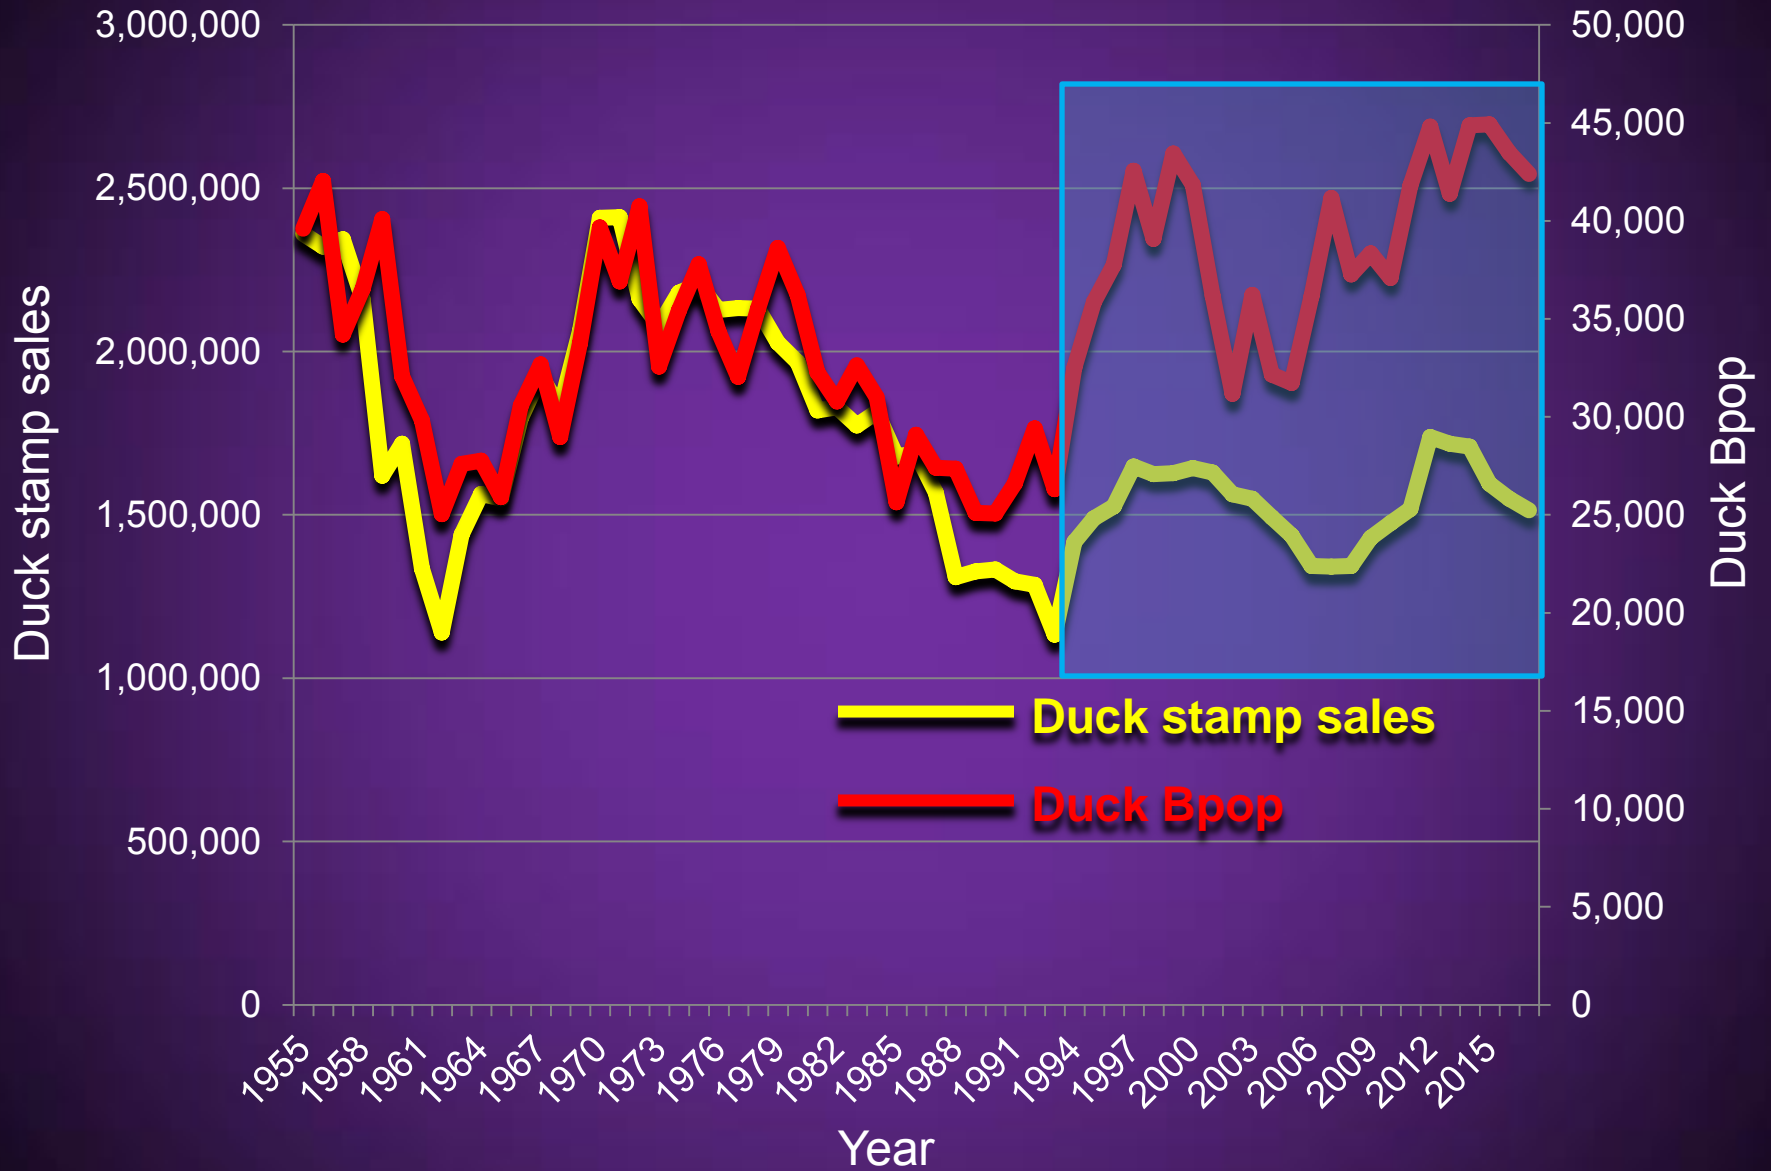

# 2012 North American Waterfowl Management Plan Goals:

1. Abundant and resilient waterfowl populations to support hunting and other uses without imperiling habitat.
2. Wetlands and related habitats sufficient to sustain waterfowl populations at desired levels, while providing places to recreate and ecological services that benefit society.
3. Growing numbers of waterfowl hunters, other conservationists, and citizens who enjoy and actively support waterfowl and wetlands conservation.

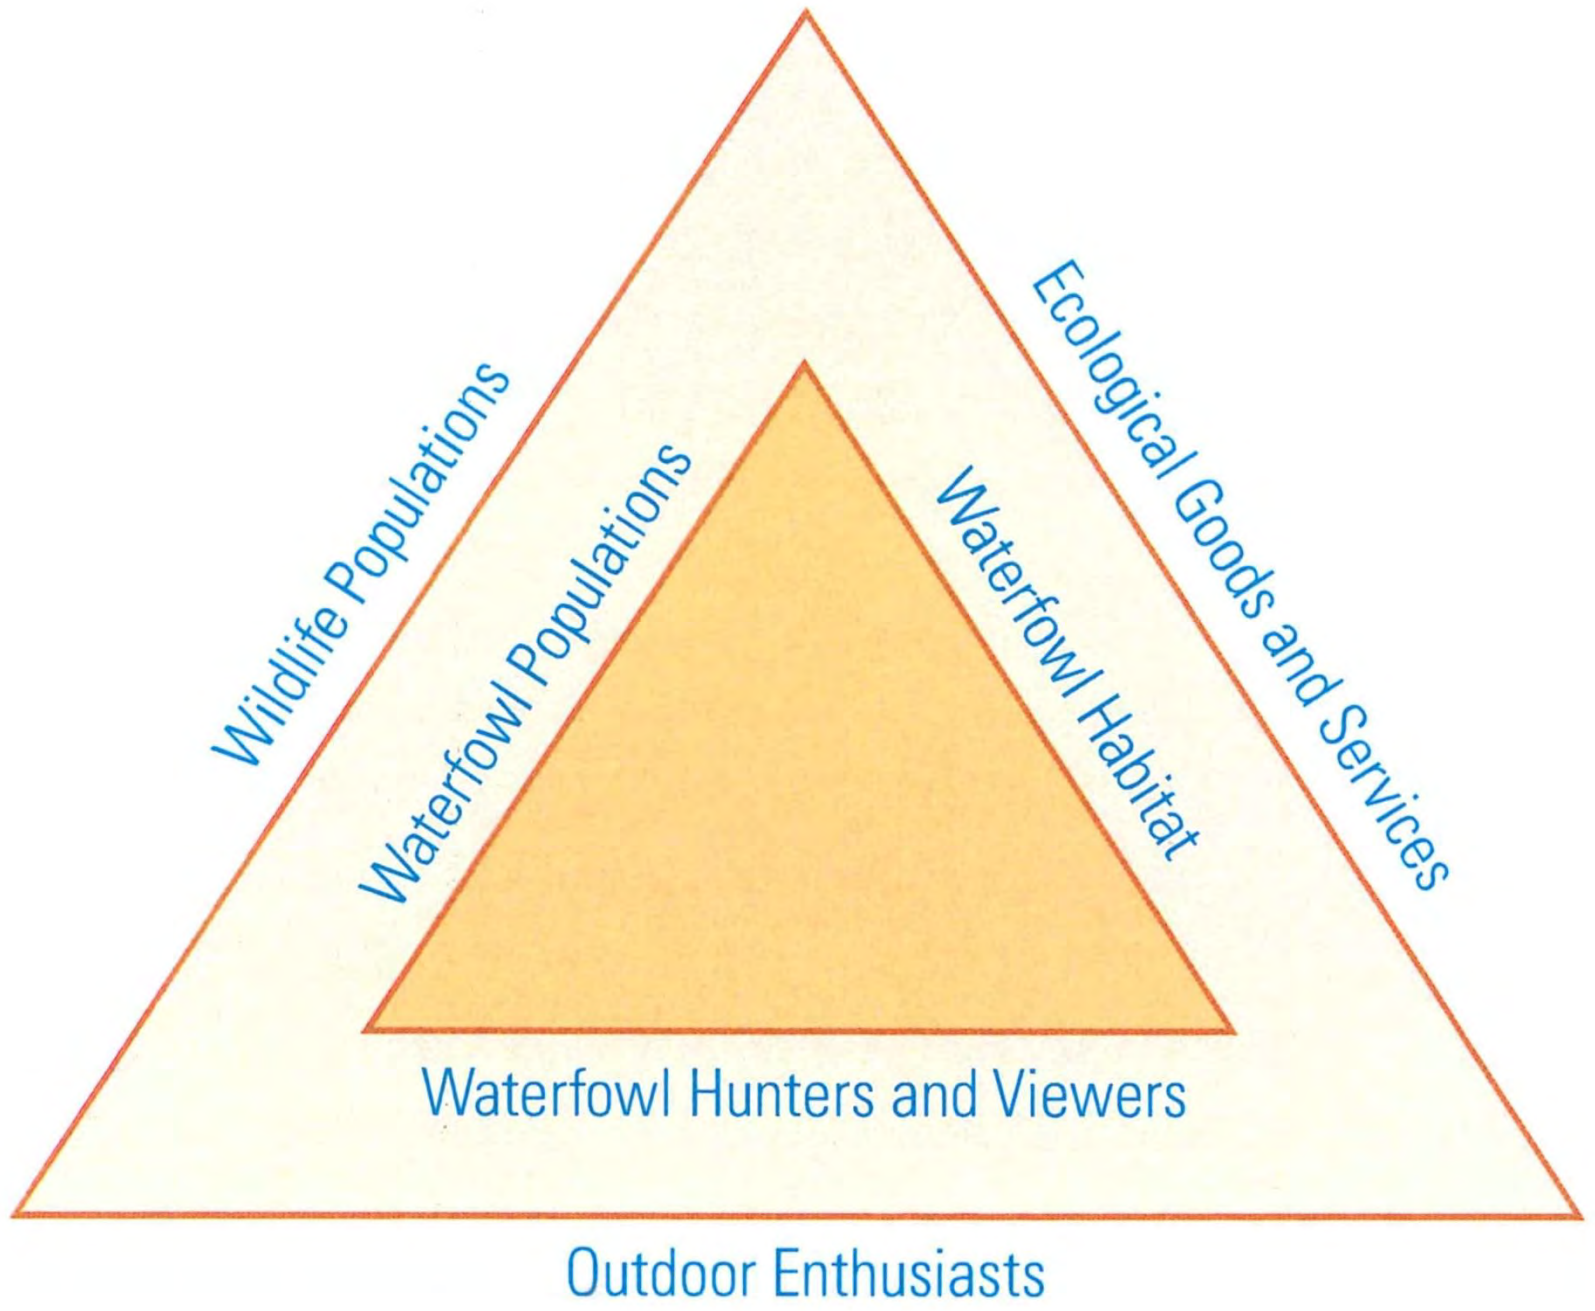

# Duck Stamp Sales and Duck Breeding Populations, 1955-2017

# Waterfowl Hunter Recruitment and Retention Strategy - 2007

# **The Future of Waterfowl Management Workshop Minneapolis, MN, 2008.**

**Recommended expanded  
capacity for survey, assessment,  
and modeling of social attitudes  
related to waterfowl hunting  
and habitat conservation  
to assure the necessary and  
appropriate consideration  
of human dimensions elements  
in a unified framework for  
waterfowl management.**

**The Future of Waterfowl Management Workshop**

Framing Future Decisions for Linking Harvest,  
Habitat, and Human Dimensions

August 26-28, 2008

# The North American Waterfowl Management Plan (NAWMP) - 1986

*“...The goals in this Plan should be sufficient to maintain populations of ducks of various species and their habitats at levels acceptable to people who use and enjoy them...”*

# The North American Waterfowl Management Plan - 1986

*“...Meeting these goals would provide the opportunity for 2.2 million hunters in Canada and the United States to harvest 20 million ducks annually. It would also provide benefits to millions of people interested in waterfowl for purposes other than hunting. An overall objective of management agencies is to accommodate the diverse public interests in waterfowl and to assure that all citizens can benefit from abundant waterfowl populations.”*

# *Growing numbers of waterfowl hunters, other conservationists, and citizens who enjoy and actively support waterfowl and wetlands conservation.*

Wildlife Society Bulletin; DOI: 10.1002/wsb.791

## **Incorporating Human Dimensions Objectives Into Waterfowl Habitat Planning and Delivery**

**PATRICK K. DEVERS,<sup>1</sup>** *U.S. Fish and Wildlife Service, Division of Migratory Bird Management, Laurel, MD 20708, USA*

**ANTHONY J. ROBERTS,** *U.S. Fish and Wildlife Service, Division of Migratory Bird Management, Laurel, MD 20708, USA*

**SCOTT KNOCHE,** *Patuxent Environmental and Aquatic Research Laboratory, Morgan State University, St. Leonard MD 20685, USA*

**PAUL I. PADDING,** *U.S. Fish and Wildlife Service, Division of Migratory Bird Management, Laurel, MD 20708, USA*

**ROBERT RAFTOVICH,** *U.S. Fish and Wildlife Service, Division of Migratory Bird Management, Laurel, MD 20708, USA*

**ABSTRACT** The 2012 revision of the North American Waterfowl Management Plan (NAWMP) explicitly recognized the need to increase recruitment and retention of waterfowl hunters, birdwatchers, and other conservationists to maintain support for wetland conservation. The incorporation of human dimensions objectives within the NAWMP has compelled waterfowl and wetland managers to consider whether and to what extent landscape characteristics such as public land access; the type, amount, and location of wetlands; and site infrastructure will increase support for wetland conservation among user groups. Further, it has forced the waterfowl community to consider the possible trade-offs between managing land to achieve

# Human Dimensions in Waterfowl Management

## Definition of HD in wildlife management:

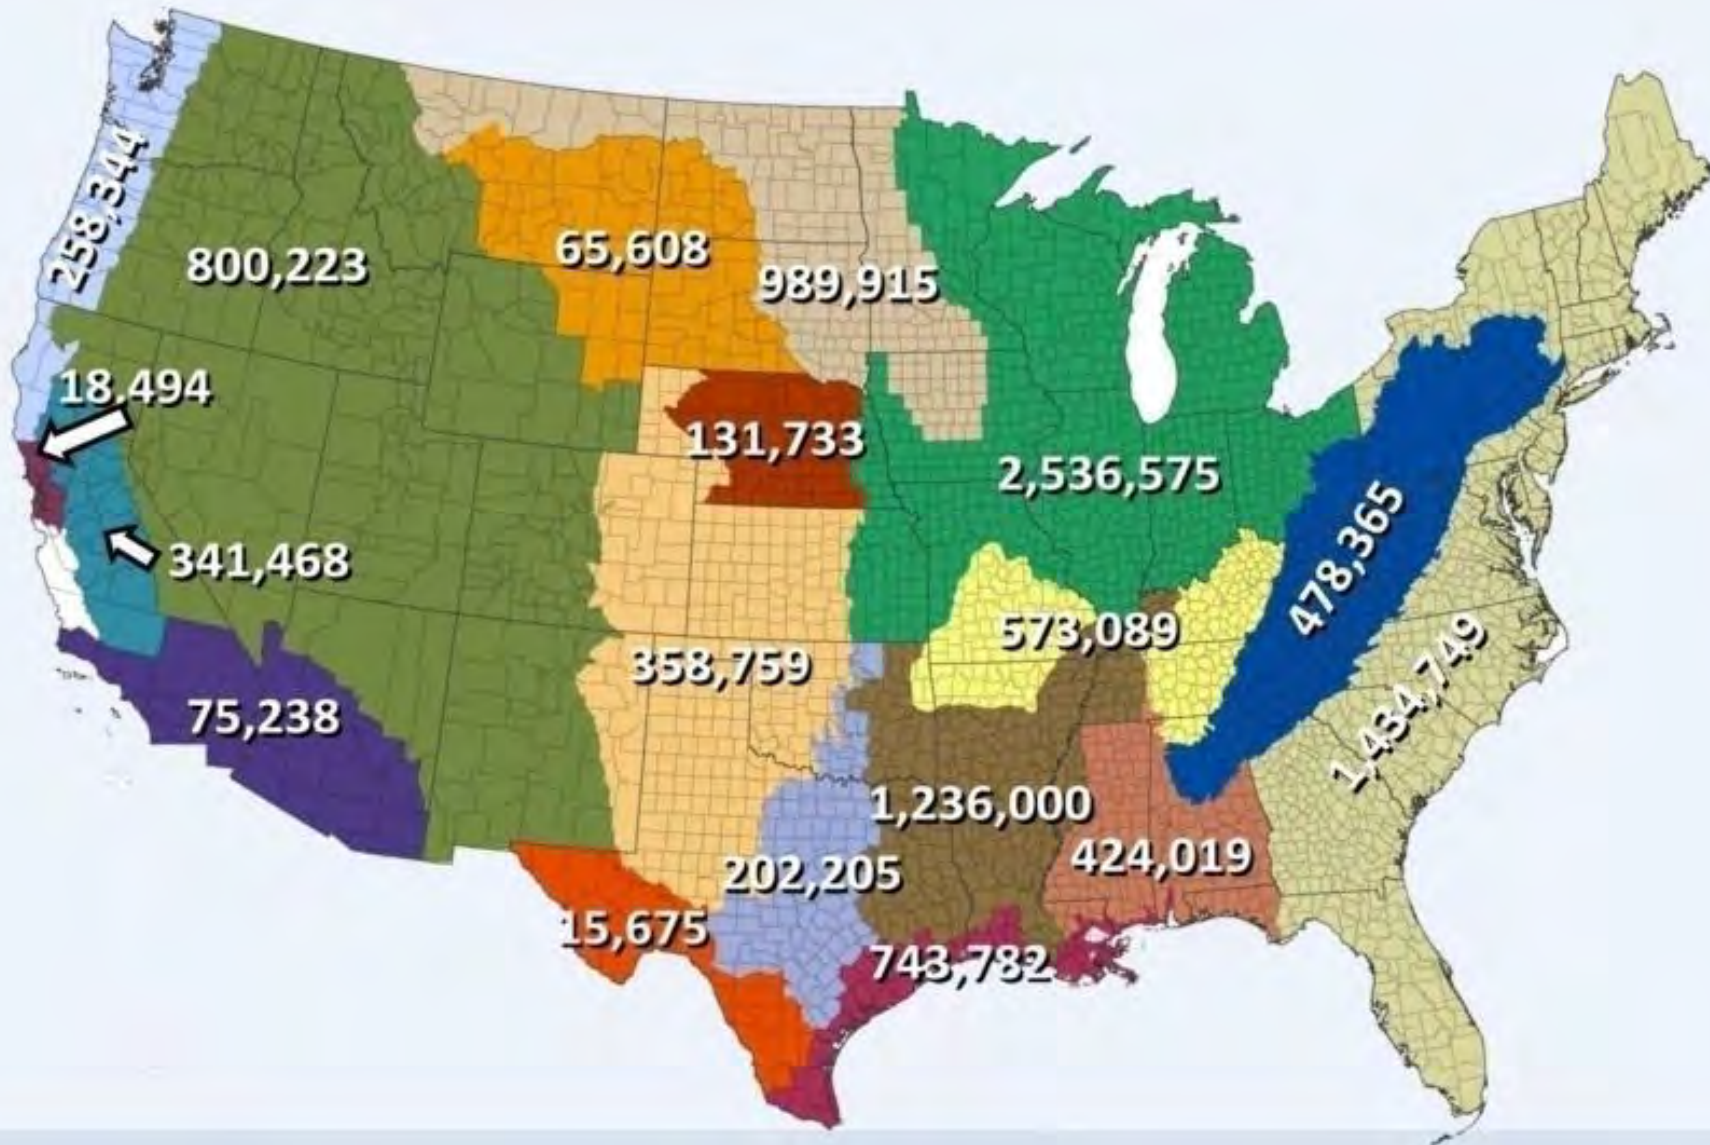

- How people value/use wildlife;
- How they want wildlife to be managed;
- How they affect or are affected by wildlife & wildlife management decisions.

# Upper Mississippi/Great Lakes Joint Venture

# Waterfowl hunter days (10 million) distributed by U.S. JV region

# Goal for Waterfowl Supporters

NAWMP Goal 3: “Growing numbers of waterfowl hunters, other conservationists, and citizens who enjoy and actively support waterfowl and wetlands conservation.”

*Objective: We will increase waterfowl conservation support among various constituencies to at least the levels experienced during the last two decades.*

# Targeting Conservation

## Objectives

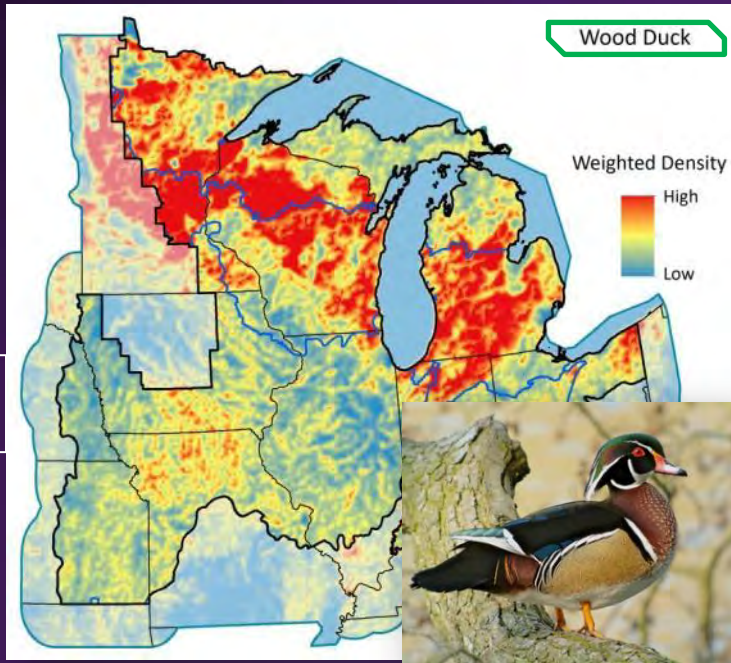

## Spatial Data

<b>Maximize focal species recruitment through conservation of high quality <u>breeding</u> habitats</b>	<b>Density and distribution of key breeding habitats for ducks</b>
<b>Maximize focal species survival and body condition with habitat focus on cross-seasonal effect (non-breeding period)</b>	<b>Duck harvest relative to wetland abundance - surrogate for non-breeding wetland area limitation</b>
<b>Maximize hunter retention and recruitment</b>	<b>Harvest distribution of ducks and geese – reflects successful hunter distribution</b>
<b>Maximize waterfowl viewer / recreationist retention and recruitment</b>	<b>Human distribution and distance to potential habitat areas</b>
<b>Minimize nutrient and sediment runoff detrimental to river system ecology – Gulf Hypoxia focus</b>	<b>Mississippi River sub-basins (8-digit HU) most impaired (high cultivated cropland / development coverage)</b>
<b>Maximize health, function, and biological diversity of Great Lakes coastal zones – coastal wetland focus</b>	<b>Great Lakes coastal sub-basins (8-digit HU) most impaired (cultivated cropland / development coverage)</b>

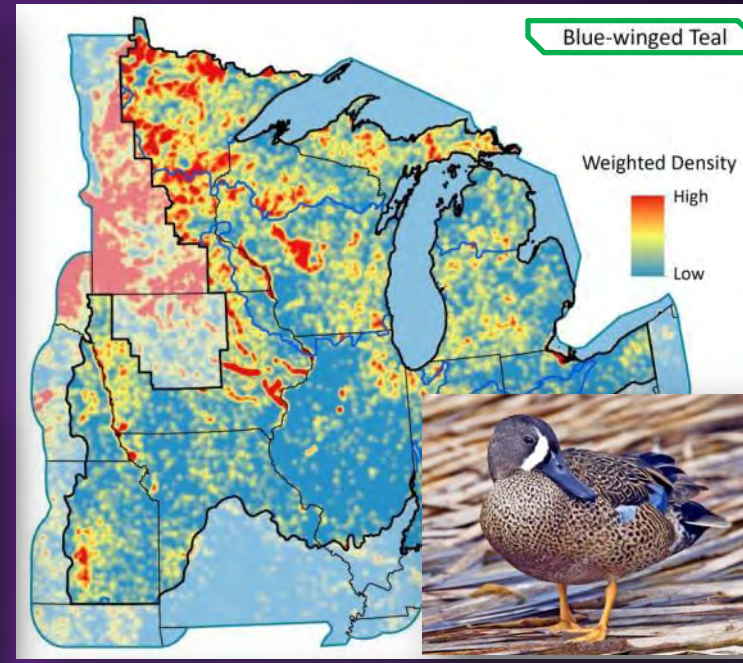

# Density and distribution of key breeding habitats for ducks

# Rainwater Basin JV?

LOOKING TO THE FUTURE

An Implementation Plan for  
the Rainwater Basin Joint Venture

North American Waterfowl  
Management Plan

- ▶ HD needs were identified in RWBJV plans.
- ▶ Need to begin work on integrated approach.
- ▶ Exploring access to hunter data regarding satisfaction/use - which could establish hunter objectives.
- ▶ Preliminary data on some economic work.

## Challenges:

---

### ▶ Establishing “People” Goals

#### What people?

- Hunters
- Non-consumptive users
- Public

- ▶ Changing/modifying priorities/objectives
- ▶ Little or no HD expertise in JV or partners.
- ▶ Increased communication/cooperation.

***Growing numbers of waterfowl hunters, other conservationists, and citizens who enjoy and actively support waterfowl and wetlands conservation.***

**People Conserving  
Waterfowl and Wetlands**

North American Waterfowl  
Management Plan  
Plan nord-américain de  
gestion de la sauvagine  
Plan de Manejo de Aves  
Acuáticas Norteamérica

- ▶ **Specific, numeric goals were set – but need more work (e.g., landowner objective).**
- ▶ **Goals need to align with other efforts (e.g., national R3 plans).**
- ▶ **Still a lot unknowns or assumptions about HD information.**

# 2018 NAWMP Update Recommendations:

- ◆ Focus conservation actions on waterfowl habitat and population management objectives and incorporate social science into planning and program delivery.
- ◆ Help people understand the opportunities for conservation and outdoor recreation resulting from NAWMP and how society benefits from waterfowl habitat.
- ◆ Compel people to take action to conserve waterfowl habitat.
- ◆ Identify key geographic areas where the best opportunities exist to meet the needs of waterfowl and people.

2018

Acuáticas de Norteamérica

# 2018 NAWMP Update Recommendations:

- ◆ Establish a process to review and update Plan objectives every 10 years and provide guidance on implementation.
- ◆ Share knowledge from all work to integrate and balance The needs of habitat, waterfowl, and people.
- ◆ Bolster training programs for future waterfowl management professionals.
- ◆ Replace the Interim Integration Committee (IIC) with a new system of liaisons between the Plan Committee and the working groups and appoint ex-officio members from the working groups to the Plan Committee.

# Human Dimensions in Waterfowl Management

---

## How people value wildlife:

- **Recreation**
  - 77 million Americans participate in wildlife
- **Education**
  - Informing individuals how our world functions
- **Aesthetics**
  - Appreciate seeing wildlife in natural environment (wildlife viewing tours)
- **Biological/Ecological**
  - Pollination, seed dispersal, nutrient cycling

# Human Dimensions in Waterfowl Management

---

## How people value wildlife:

- **Sociocultural**
  - Hunting and fishing traditions that become important within culture.
- **Commercial**
  - Regional economy benefits from \$ wildlife-users spend on food, lodging, fuel, & equipment.

# Recruiting new, retaining old

- Why haven't they, or why did they quit?
- How do we get them into it or back into it?
- How many do we need or want?

- ▶ **How are we going to engage non-consumptive users into paying for conservation?**
- ▶ **Do they already support conservation?**
